Business and Property Protection Portal
A web portal to guide clients through the importance of resilience measures

The Business and Property Protection Portal (BPPP) highlights the risk factors affecting any business in any UK postcode, and provides necessary guidance.

Why use the BPPP?

The BPPP includes a huge library of selected risk-control guides, resources, products and services. You can use it as a tool to guide the conversation with your client, or make specific and relevant plans before the meeting.

All you have to do is input the business type, postcode, complete a number of standard check boxes, and the web portal generates a bespoke report of suggested loss-mitigation measures.

Features

- The portal has collated risk-control data and statistics specific to postcodes in the UK, including:

  - fire loss statistics and emergency service response times

  - flood data, weather and geographical risk factors

  - theft, vandalism and cyber-crime statistics.

- The tool was developed by RISCAuthority (Risk Insight, Strategy and Control Authority) and the Fire Protection Association (FPA).

The benefits of the Business and Property Protection Portal

- Helps convince businesses that adopting resilience measures is an absolute necessity.

- Provides tailored analysis for business risks including fire, flood, weather and crime.

- Supports CEOs and MDs in protecting profit, taking care of the workforce, and acting in the long-term interests of all stakeholders.

- Presents advice in a meaningful way, providing recognised industry-standard guidance.

- A cost-effective way of maintaining engagement with customers, especially where site visits are less frequent.
