Protection against water damage

Don't let a trickle become a flood, or a flood become a disaster

LeakSafe provides protection from water damage, such as burst pipes and leaks which, according to the Association of British Insurers (ABI), costs businesses over £930 million* every year.

Why have LeakSafe's solution?

Water leaks can have a significant impact on businesses and landlords. Apart from the damage they cause to property, contents or stock, there's the potential loss of income, rent or interrupted business, and the potential cost of alternative accommodation.

LeakSafe products

You can fit LeakSafe products at any stage of construction or occupancy. The systems are appropriate for mains, gravity, and pressurised water systems in all types of premises.

- **WaterSwitch2** – automatic shut-off if a leak is detected. Ideal for larger properties, holiday homes, and vacant buildings. Also offers alarm and SMS notification.
- **WatertAPP** – an app-based water shut-off and leak-detection system.
- **RiskMonitor** – a cloud-based risk-notification system to monitor escape of water, humidity, temperature and CO2. SMS, email or voice alerts when risk thresholds are exceeded, or log in and view.
- **xFlow** – for construction sites and properties where localised leak detection is not possible. Automatically monitors water used, and turns off if pre-set limits are exceeded.

The benefits of installing a LeakSafe system with NIG

- An early warning system that should detect even minor drips before there's any significant damage, reducing potential repair and maintenance costs.
- Helps property owners minimise the risks associated with water leaks and burst pipes.
- Tailored to each property's occupancy, characteristics and risk.
- Peace of mind for owners and occupiers, enhancing their experience of the property, as well as occupation rates because of fewer leaks.
- By installing a LeakSafe system you have the potential to reduce premium.
- With NIG, your clients receive a 40% discount on RRP. NIG policy number needs to be provided.
